

# XENOX

## YOUR ONE-STOP JEWELLERY PARTNER

Our unique selling point as the XENOX brand is that we are a one-stop shop. We pride ourselves on offering not only the must-have essentials for everyday wear, such as classic necklaces, but also an impressive variety of styles and trends. From the basics that are essential in any collection to the hottest trend pieces, we really do have EVERYTHING needed for a comprehensive and contemporary jewellery selection. The centrepiece of our brand is the new LAB GROWN DIAMONDS product line, which consists of laboratory-grown diamonds whose quality and chemical composition are completely identical to natural diamonds. Our jewellery is made from 375/- or 585/- gold, high-quality recycled 925/- sterling silver with a choice of 18-carat gold plating or high-quality stainless steel. At XENOX, you will not only discover pieces of jewellery, but also a partnership you can rely on.

## THE NEW GENERATION OF DIAMONDS

The demand for diamonds as jewellery or investment opportunities has always been high. However, many consumers are looking for an ethical and environmentally friendly alternative. XENOX Lab Grown Diamonds offer exactly this choice as they are real diamonds that are chemically, physically and optically the same as natural diamonds. They are produced with advanced technology and usually have a better colour & clarity than mined diamonds. The grading of XENOX Lab Grown Diamonds is also graded according to the 4Cs - carat, colour, clarity and cut - just like natural diamonds.
