BEST QUALITY

At QUDO, quality always comes first and this is reflected in every piece of jewelry. The quality of a piece of jewelry starts with the materials it is made from. We select our materials with the utmost care. We rely on high-quality raw materials to ensure that your piece of jewelry is not only beautiful, but also particularly durable.

HIGH-QUALITY MATERIALS

European crystals: Our jewelry features sparkling European crystals. Different cuts ensure a breathtaking sparkle and add a touch of elegance and brilliance to our jewelry pieces.

Crystal beads: Our collection also includes dazzling crystal beads, which are prized for their unique beauty and add a very special touch to our designs.

Highly polished stainless steel: Our jewelry is made of highly polished stainless steel. This material is characterised by its robustness and durability. Stainless steel is hypoallergenic and is therefore ideal for sensitive skin.

IP coating in gold and rose gold: Some of our jewelry designs are finished with an extremely durable IP coating in gold or rose gold. These coatings are not only particularly resistant, but also provide a luxurious look.
